Day -10- Report
(Work Summery)

INTERNSHIP at AkashTechnolabs

❖ Day-10 : What we have learnt ?

➢ This was our last days of this amazing internship. In this session we learned about databases and its applications.

➢ Django has a inbuilt support of mainly five databases.
  1. PostgreSQL
  2. MariaDB
  3. MySQL
  4. SQLite
  5. Oracle

➢ Then we learned how to connect MySQL and SQLite databases to our Django project and perform basic operations on databases with use of our Django application.

➢ Then we learned how make models and how to migrate into our connected databases.

➢ Then we learned how to perform CRUD operation separately. And saw how those work.

➢ Then we discussed some problems and errors which were coming to some student and solve them.

➢ Then we also discussed which are various platforms where we can deploy our Django project very easily.

➢ After that we jumped into Latest Technologies and discussed about them that which technologies are ruling market at present and also will rule in coming years.

✧ This Internship is Task Based Internship. So at the end of this session we got one Task.
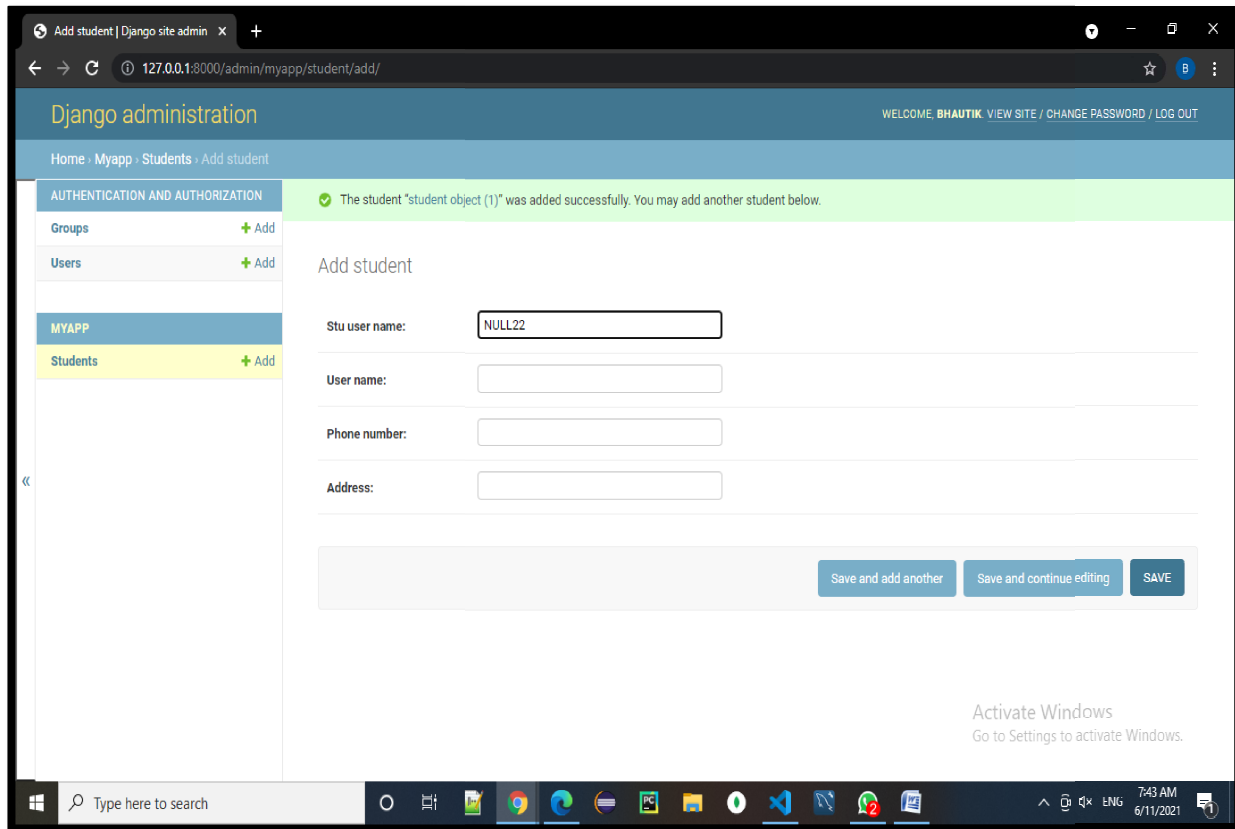

❖ Tasks :-
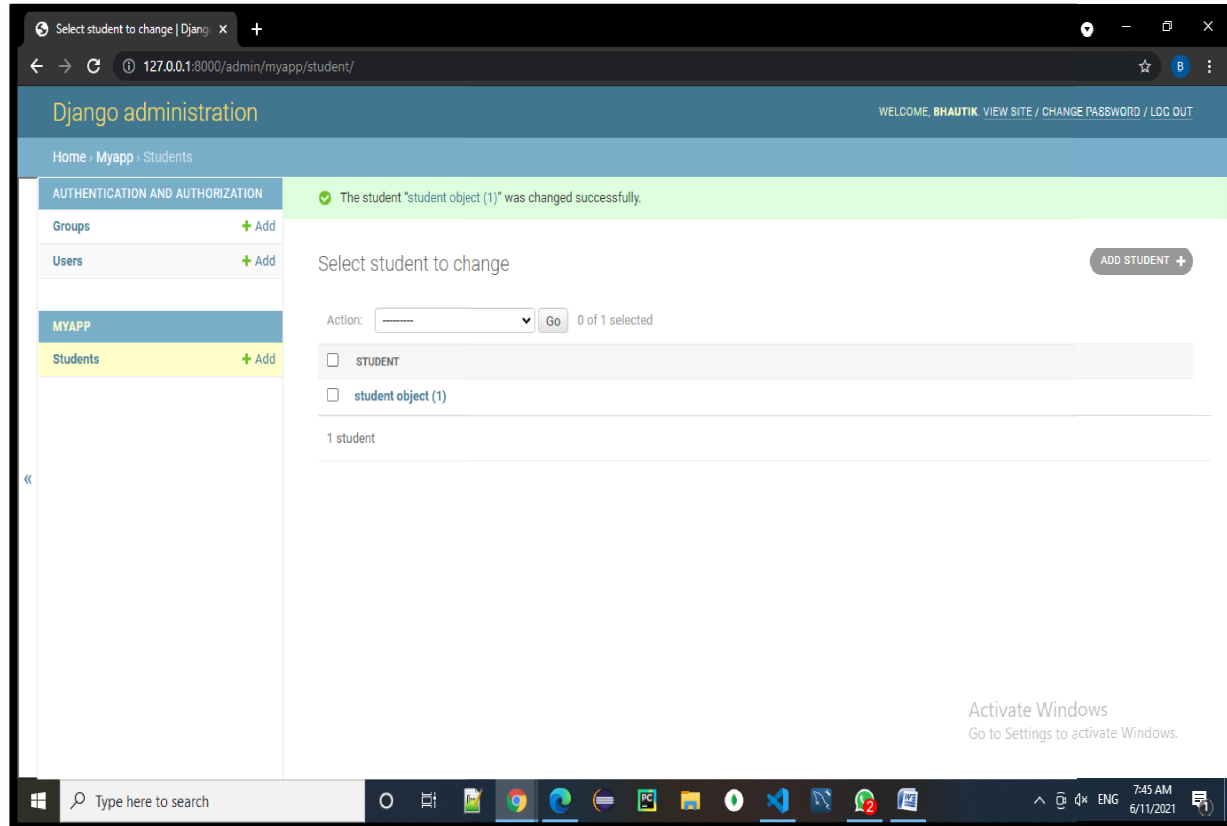

Django DB CRUD Operation.

❖ Output :-

- # Create Table

• **Add Table**

- # **Update Table**

• **Delete Table**
